2018

Goldstream Provincial Park

Goldstream Programs

Grades K/ 1 1 + hour \$5+GST per student (min \$125+GST per class)

BIG IDEAS: *Observe plants & animals, daily/seasonal changes, behaviors/survival*

- 1) **Bodacious Bugs!** What's a bug? Find out as we inspect the insects of the area and learn some nifty sampling and ID techniques.
- 2) **Forest Explorers** Wake up your senses! We are the sleuths and we are hot on the trail of nature!

Grades 2/3 1 + hour \$5+GST per student (min \$125+GST per class)

BIG IDEAS: *Lifecycles, adaptations/survival, groupings, ecosystems, water cycle*

- 1) **Stop: It's Beaver Time!** You won't believe what these radical rodents are up to, creating habitats and harvesting their plants, making them the perfect engineers.
- 2) **Froggy Frog World** Leap into a frog's life where metamorphosis will transform you from egg to frog!
- 3) **May the Forest be With You** The forces of nature reveal secrets of the forest: How do animals/plants survive in this environment?
- 4) **Dr. Drip** It's everywhere! We are made of it, the Earth has had it since the age of the dinosaurs and it's a resource more valuable than gold! Drip Drop into the discovery of the water cycle with Dr. Drip.

Grades 4 1 + hour \$5+GST per student (min \$125+GST per class)

BIG IDEAS: *Living things sense and respond to environment, habitats/communities, motions of Earth and moon*

- 1) **Prospector Penny** Experience GOLD RUSH fever as you follow "Penny" in her adventures through BC History—will you strike it rich?
- 2) **Tides and Tidal Creatures** You'll be amazed at how the moon and Earth's movements have created a gnarly home and how creatures and plants must adapt to survive in this habitat!
- 3) **Look at that...a Habitat!** From the micro to the macro—Goldstreams habitats are everywhere! Group who lives where and who eats who in this park's community.

Grades 5/6/7 1 + hour \$5+GST per student (min \$125+GST per class)

BIG IDEAS: *Resources, earth movements/changes, multi-cellular organisms, internal systems/survival, evolution/survival*

- 1) **Geologic Journey** From mountain building to erupting volcanoes, it's a wild ride through plate tectonics, the ring of fire and Earth's movements.
- 2) **BSI - Bone Scene Investigation** You and your students have just landed on a new planet, filled with remains of... what? Who? Discover the secrets of bone reading and find out who's been here before you!
- 3) **Squids in the Hall**** Mollusk? Cephalopod? If you're a sucker for a good time join our squid investigation, dissection and maybe even a tasting! **additional fee applies
