Program Descriptions

Find Out More: www.naturehouse.ca

- *PARKS DAY — Join us as we celebrate all parks at the Nature House! Stop by the amphitheatre in the evening for Rathtrevor's Got Talent!
- *MOVIE NIGHT—7PM Movie in the park, amphitheatre style! Snacks and drinks by donation — all proceeds go to the Nature House and programs.
- *NIWRA Live Raptor — The North Island Wildlife Recovery Centre joins us with a live raptor and a presentation that is sure to leave you hooting for more!
- BC Reptile Style — What makes a reptile a reptile? What kinds live here? It isn't easy being cold-blooded in B.C! Good thing our reptiles are some of the coolest critters around!
- Crucial Creatures - What species hold the keys to the food web? Ready your paws, claws and stingers to find out about keystone species and unlock the secrets of ecosystems from air to sea to land.
- Cute but can't Kelp it! — There's a whole world down there! Dive into this program to go in depth on BC's fantastic underwater forests and the critters that live there.
- Feeling Gullible — There's a lot to squawk about when it comes to these conspicuous birds: you'll never look at a seagull the same again!
- Feisty Flora - Deadly poisons, acid-tipped barbs, self-sealing walls—are these 007's newest spy tools? Nope, they're some of the incredible defense strategies plants use to foil their foes!
- Here be Dragon...flies - Let's unravel the mystery of some of Earth's best pilots: dragonflies! How are they so nimble? What do they eat? Come on down to find out!
- Mushrooms: from Marvelous to Murderous - Get to the root of our mischievous mushrooms' mysterious motives and find out just who they are and whether or not they can be... murderous.
- Spineless Wonders - From squids to spiders, spineless species rule the world! Come find out the amazing adaptations that allow these creatures to thrive even without a backbone!
- The Rath of Science - Crazy chemical reactions! Startling displays of physics! See the power of science on display, and learn a bit about how the world works through demonstrations of the laws of nature.
- Tick Talk - It's time to have the talk about a certain arachnid in these parts.
- Who wants to be a Salmon Heir? Come on down and be a contestant on Rathtrevor's latest game show. Learn about the amazing salmon life cycle and leave with some fantastic fishy facts!
